Barn equipment

For ideal working conditions and healthy animals

BEEREPOOT is one of Europe's leading manufacturers of barn equipment. Thanks to the trust of farmers from many countries and the growing demand of creating ideal conditions for cattle husbandry, we have come this far.

Starting as a family company in 1964 under the Dutch administration in Leer, Germany, our production and head office are in the close-by village Nortmoor (DE). At the Headquarter, modern fabrication and stock houses will guarantee a punctual production and delivery of high-quality products as well as our own innovative design planning for an ideal work process in barns. Ever since, Beerepoot has been representing a down-to-earth company with fair business conduct to customers, delivery services and co-workers as well as quality products at affordable prices followed by a broad service for innovative barn equipment and satisfied farmers.

Cubicle divider

Model CV (from 18 months)

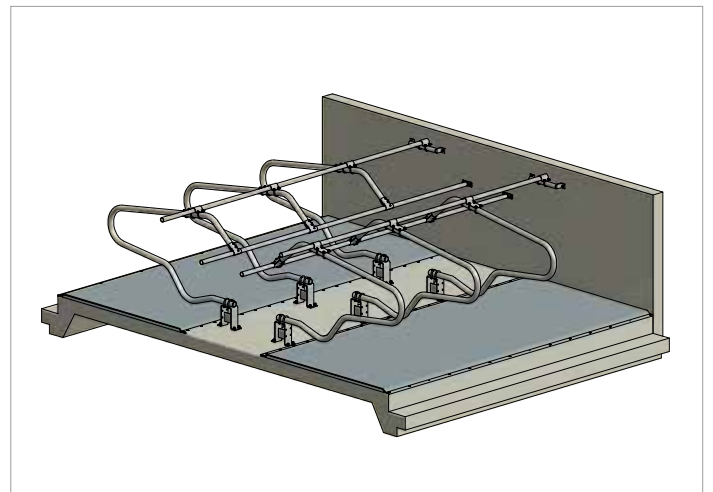

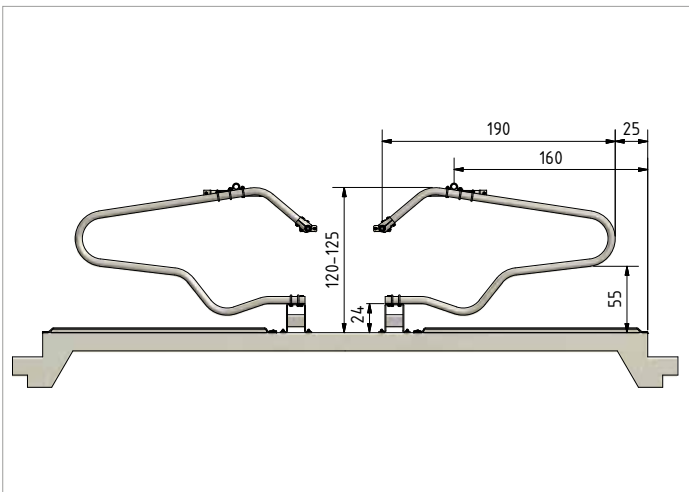

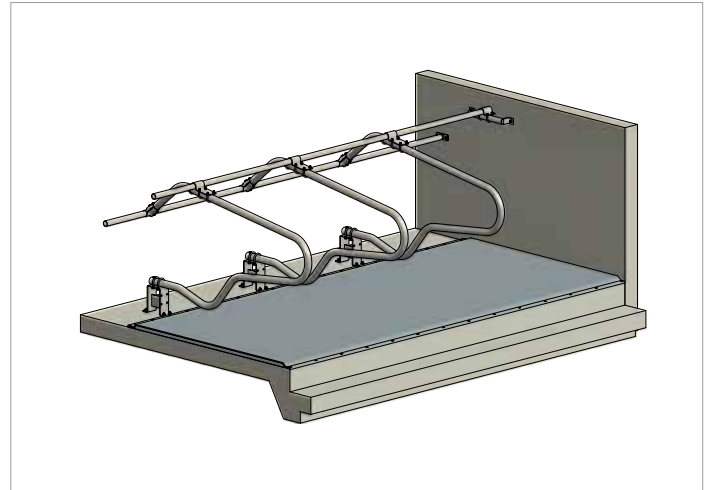

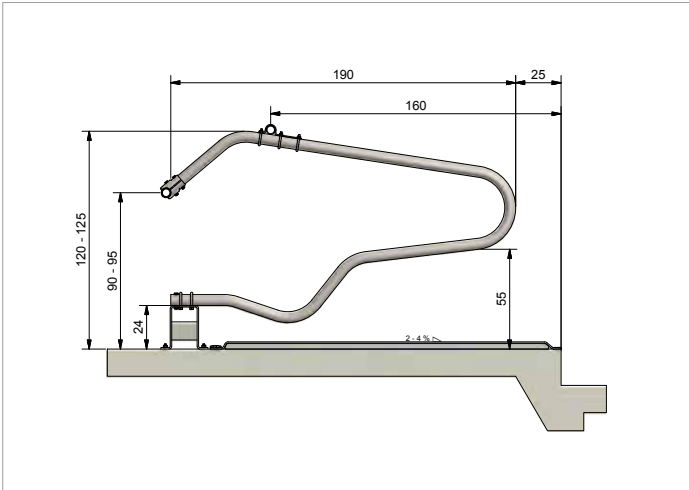

For high lying comfort, optimal hygiene and the right support while the cows getting up and lying down. The cubicle is mounted with a support foot on the concrete - no further support post is needed.

- Lots of head space up front to get up easy
- Nose bar guides cows backwards, therefore less manure on the freestall bedding
- Manufactured from sturdy thick-walled steel tube 60.3 x 3.65 mm
- Suitable for cubicles with rubber flooring
- Mounting option for PE-pipe
- Flexible to install

Optional:

- Wave-shaped shoulder bar
- Round-shaped synthetic knee bar in 125 mm or 160 mm

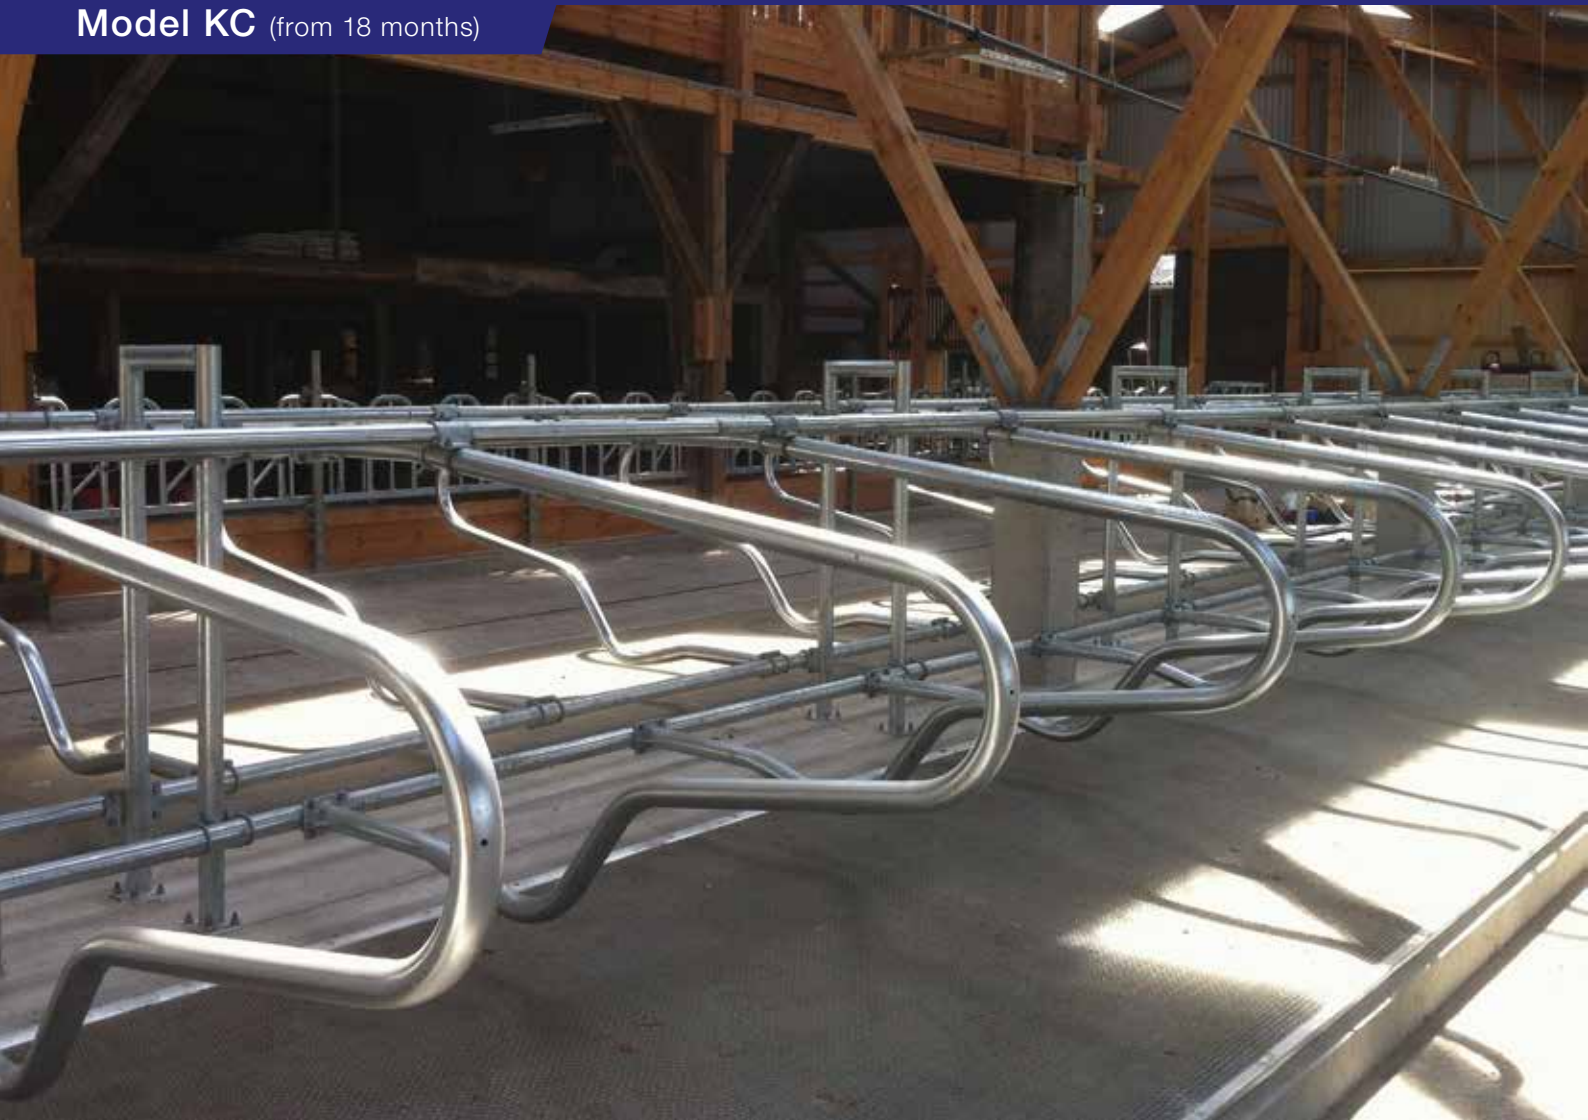

Article No.	Description
12-02290-190	Cubicle divider model CV 190x98cm
10-02295-024	Support foot with threaded strap M12 + bolt
90-22513-095	Anchor bolt hot galv. M12x95
10-22253-200	Strap clamp 48.3 x 60.3mm, extended
10-21308-000	T-clamp, twofold 48.3 x 60.3mm with 2 bolts + nuts

For accessories see page 18
For accessories knee bars see page 24

Cubicle divider

Model KC (from 18 months)

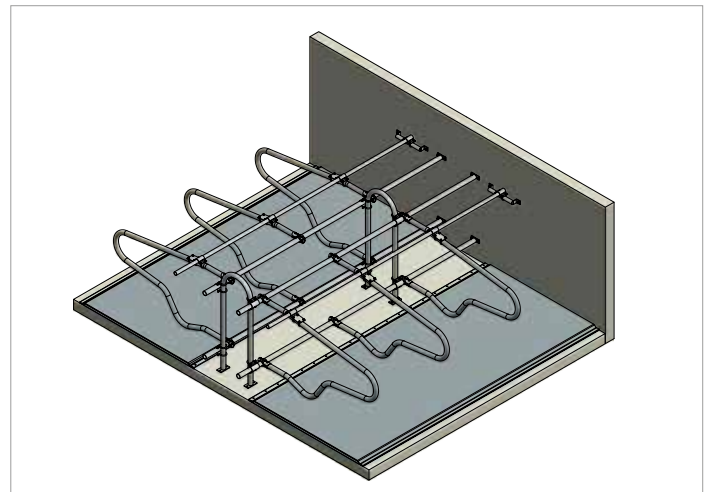

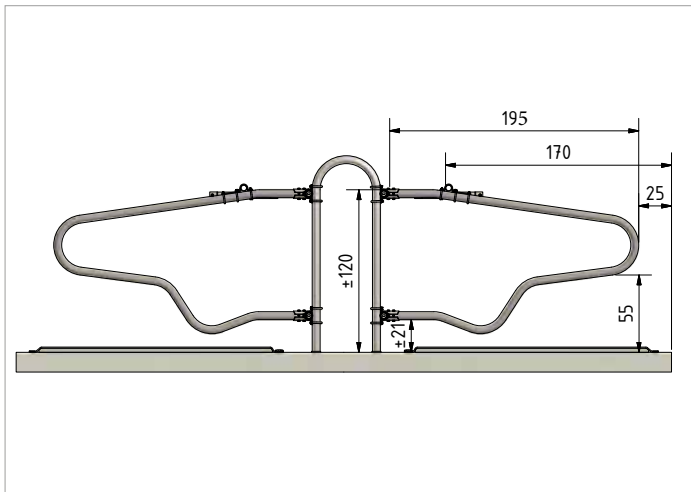

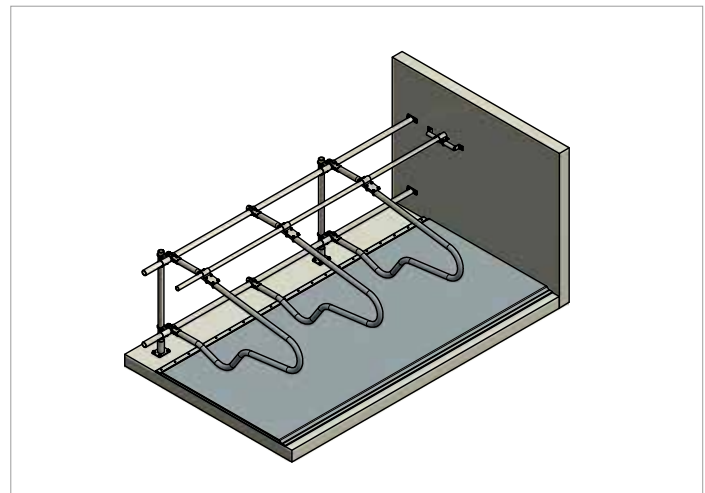

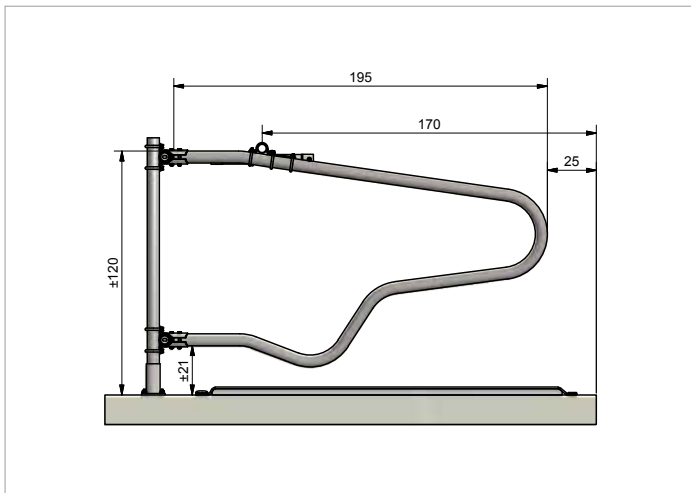

Model KC optimally limits the lying position of the cow and leads her with sufficient freedom of movement and headroom. The box can be adjusted in width for different animal holding conditions.

- Lots of headroom while lying down and getting up
- Cubicle dividers adjustable in width
- Manufactured from sturdy thick-walled steel tube 60.3 x 3.65 mm
- Suitable for cubicles with rubber flooring
- Mounting option for PE-pipe

Optional:

- Wave shaped shoulder bar
- Round-shaped synthetic knee bar in 125 mm or 160 mm

Article No.	Description
12-21990-195	Cubicle divider model KC 195 x 99 cm
12-21990-200	Cubicle divider model KC 200 x 99 cm
10-22253-200	Strap clamp 48.3 x 60.3 mm, extended
10-21317-000	T-clamp twofold 60.3 x 60.3 mm with 3 bolts + nuts
10-22151-000	Set mounting parts for 60.3 mm cubicle on 70 mm sq. support
98-22195-130	Support post 70 mm sq. x 130 cm screw on incl. end cap
98-22195-150	Support post 70 mm sq. x 150 cm screw on incl. end cap
16-21053-150	Central support 60.3 mm 150 x 70 cm screw on
16-21053-058	Central support 60.3 mm 150 x 58 cm screw on
90-22513-095	Anchor bolt hot-galvanized M12x95
For accessories see page 18

Cubicle divider

Model USA I Comfy (from 18 months)

Deep litter box with excellent lying comfort and much freedom of movement while resting. The special design of the divider positions the cows in a straight line. Easy to mount on a central support 60.3 mm x 160 cm for double rows or with a support post 76.1 mm x 180 cm cast-in for single rows.

- Excellent lying comfort
- Adjustable in height and therefore reduced contact to the cubicle
- Mounting at support post or central support
- Manufactured from sturdy thick-walled steel tube 60.3 x 3.65 mm

Article No.	Description
19-00999-025	Cubicle divider model USA-I Comfy 210x85cm
10-22253-200	Strap clamp 48.3x60.3mm, extended
10-21317-000	T-clamp, twofold 60.3 x 60.3mm with 3 bolts + nuts
10-21320-000	T-clamp, twofold 76.1 mm x 60.3mm with 3 bolts + nuts
10-21316-000	Cross-clamp, twofold 60.3mm x 76.1 mm x 60.3mm with 4 bolts + nuts
16-21053-160	Central support 60.3mm 160 x 70cm screw on
98-22040-180	Support post 76.1 mm x 180cm cast in incl. protective sleeve and end cap
99-00099-881	Wall fastener for PE tube 160 x 6.2mm
17-12120-160	Meter PE-tube 160 x 6.1 mm
16-22725-200	Distance support for 160mm PE tube
90-23512-095	Anchor bolt stainless steel M12x95
17-12123-030	Tube connector for PE tube 160mm

Cubicle divider

Model USA-II (from 18 months)

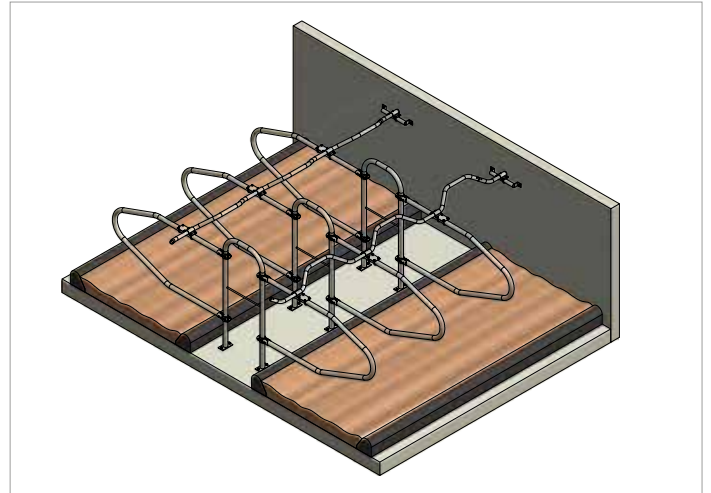

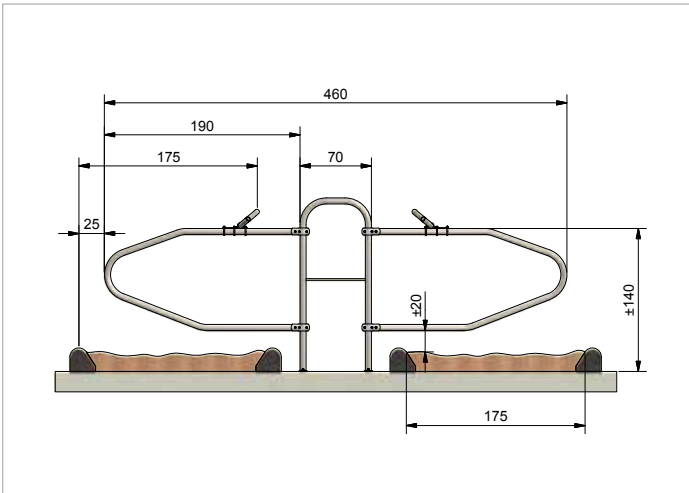

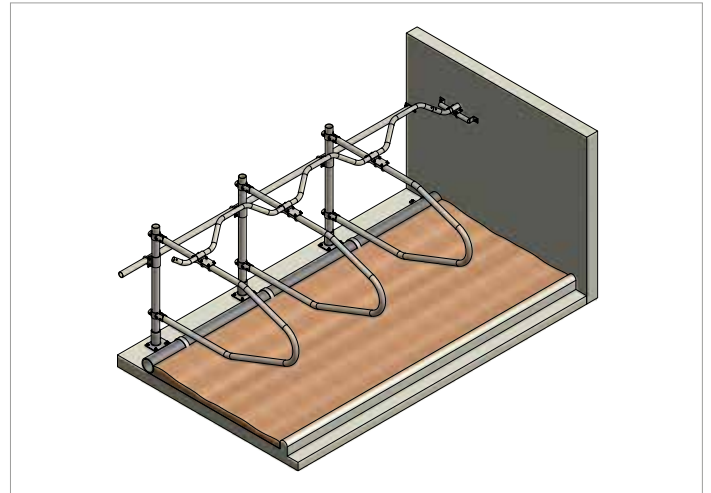

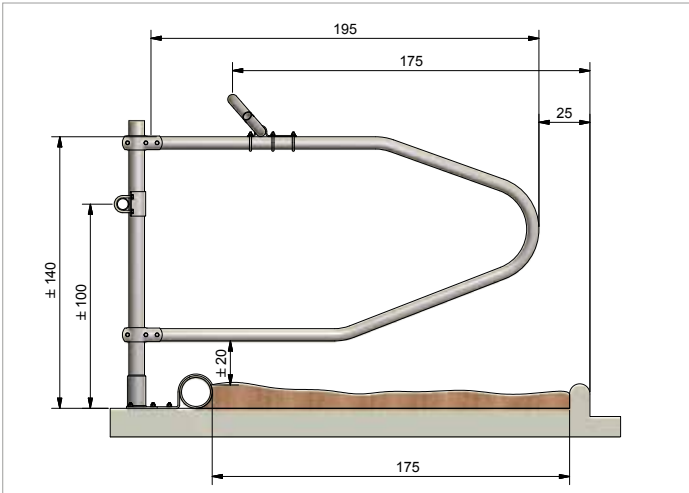

Adjustable in height and without any disturbing tubes at the front is the cubicle divider model USA-II versatily useable. It supports optimal lying comfort and therefore perfect conditions for the milk production.

- Manufactured from sturdy thick-walled steel tube 60.3 × 3.65 mm
- Divider is reversible to mount
(rotation is possible when the long side is needed for a better guiding of the cow)
- Suitable for deep litter bedding
- Solid three-point construction
- Mounting on/to support posts or front rails

Optional:

- Wave-shaped shoulder bar
- Round-shaped synthetic knee bar

Article No.	Description
12-21820-195	Cubicle divider USAII 195 x 100 cm, punched
12-21820-200	Cubicle divider USAII 200 x 100 cm, punched

95-22046-150	Support post 76.1 mm x 150 cm, heavy base 89 mm screw on
16-21051-160	Central support 60.3 mm 160 x 52 cm screw on
16-21053-160	Central support 60.3 mm 160 x 70 cm screw on
90-22513-095	Anchor bolt hot-galvanized M12x95

For accessories see page 18 | For accessories knee bars see page 24

Cubicle divider

Model USA II BS (from 18 months)

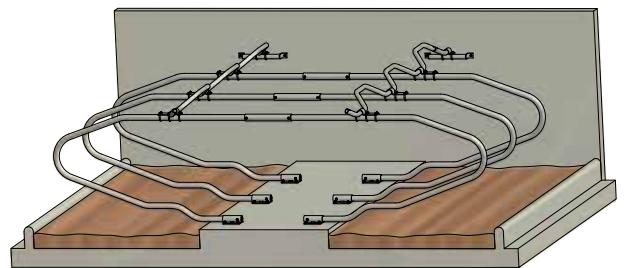

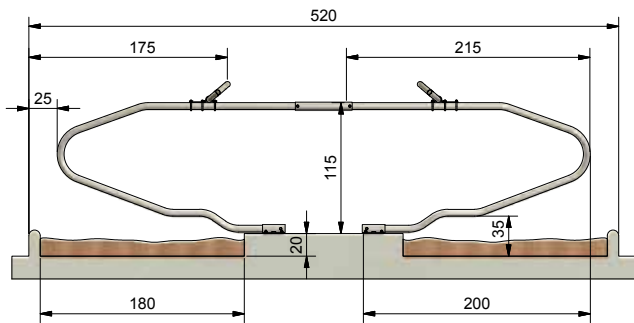

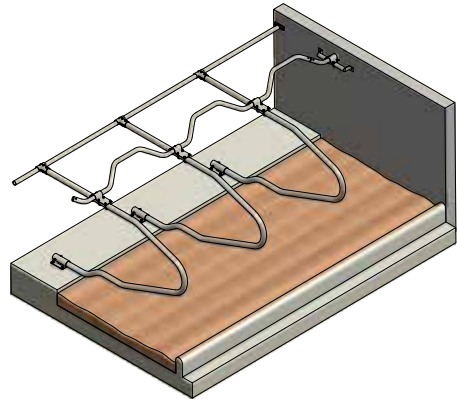

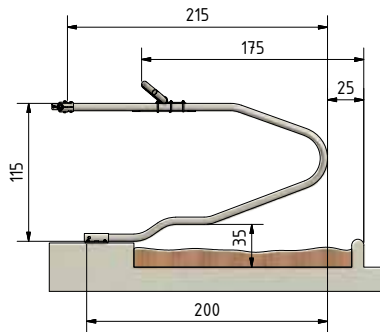

The cubicle divider model USA-II BS provides high lying comfort and leads the cow with sufficient freedom of movement. This cubicle is mounted on a brisket-concrete base and that makes it a material-saving and cheap alternative to deep litter bedding.

- Lots of head space up front to get up easy
- Optimal for deep litter bedding
- Manufactured from sturdy thick-walled steel tube 60.3 × 3.65 mm
- Solid three-point construction
- Mounting on brisket-concrete base

Optional:

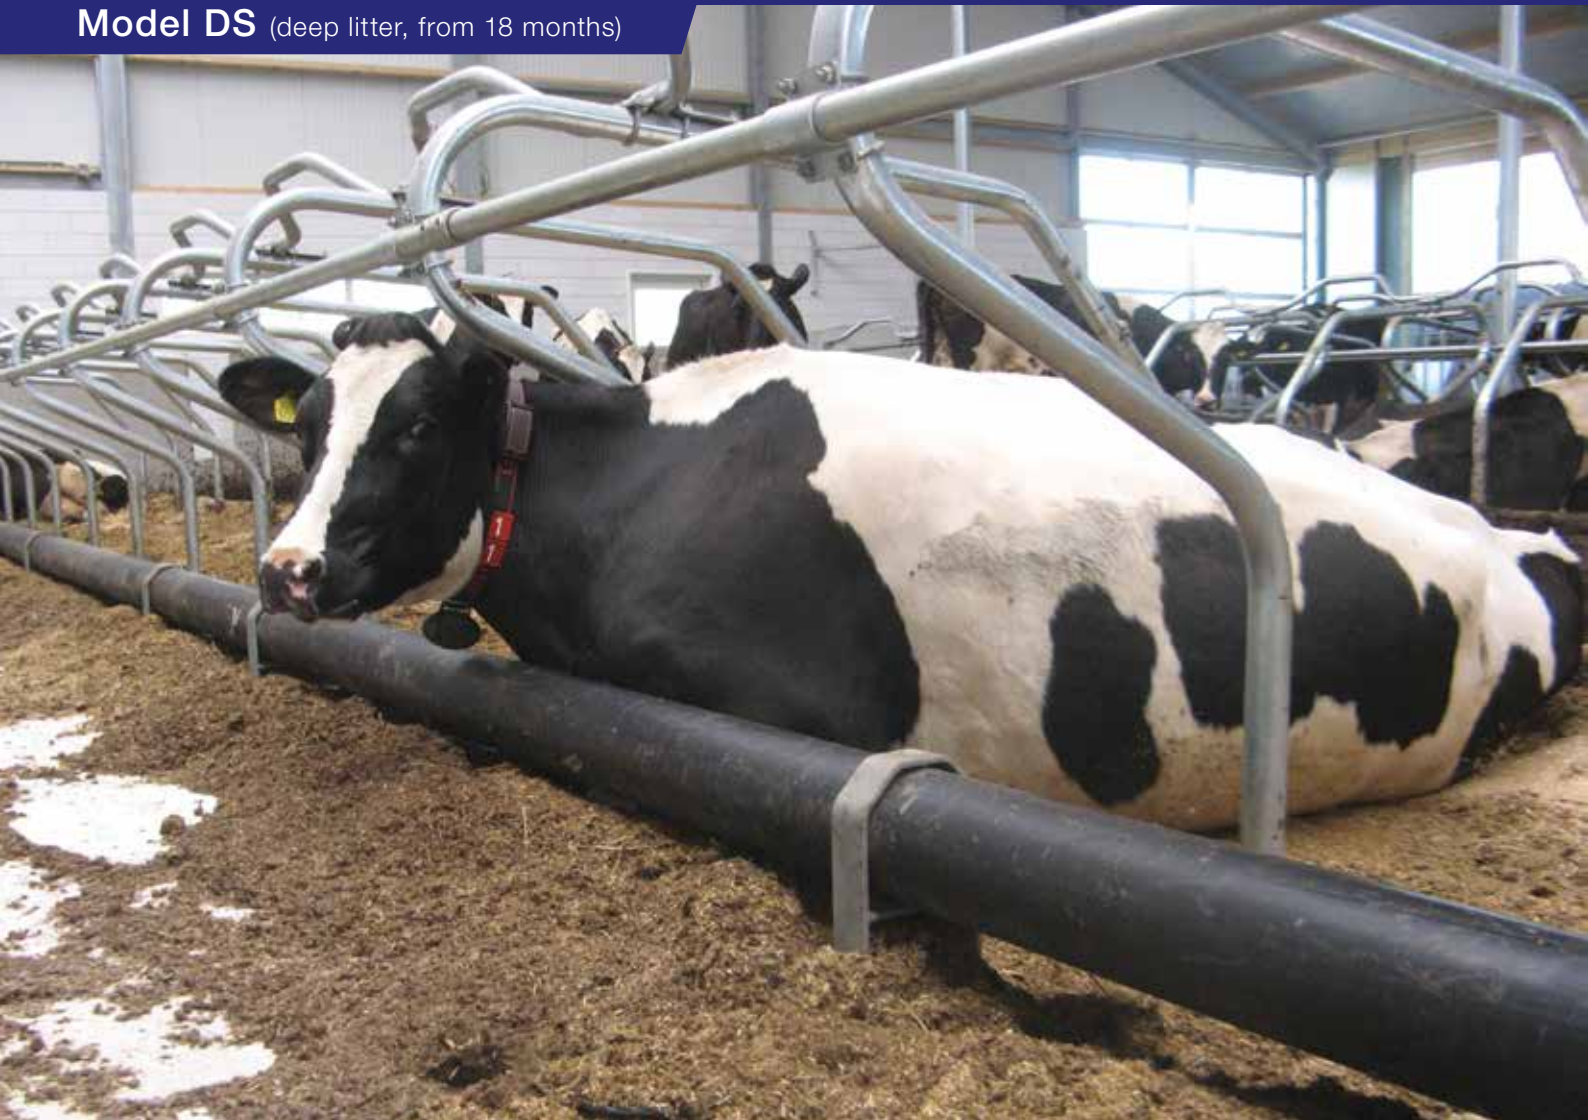

- Wave-shaped shoulder bar
- Round-shaped synthetic knee bar

Article No.	Description
12-21830-200	Cubicle divider model USA-BS 200x99cm
16-02263-000	Support foot for brisket-concrete-base 70 x 4 – 200mm with plate
16-02294-040	Connecting tube for cubicle divider 70 x 3 - 400mm
90-22055-000	Bow bracket 60.3, 30 x 5mm
10-22253-200	Strap clamp 48.3 x 60.3mm, extended
10-21308-000	T-clamp 48.3 x 60.3mm with 2 bolts + nuts
90-22513-095	Anchor bolt hot-galvanized M12x95
90-22511-090	Anchor bolt hot-galvanized M10x95
For accessories see page 18	
For accessories knee bars see page 24	

Cubicle divider

Model DS (deep litter, from 18 months)

Developed for high demands at lying comfort, dryness and skin protection as well as sufficient freedom of movement for the cows. This cubicle divider model DS is specifically for deep litter bedding. It reduces deformation of the lying area and therefore promotes the welfare and production performance of the cow.

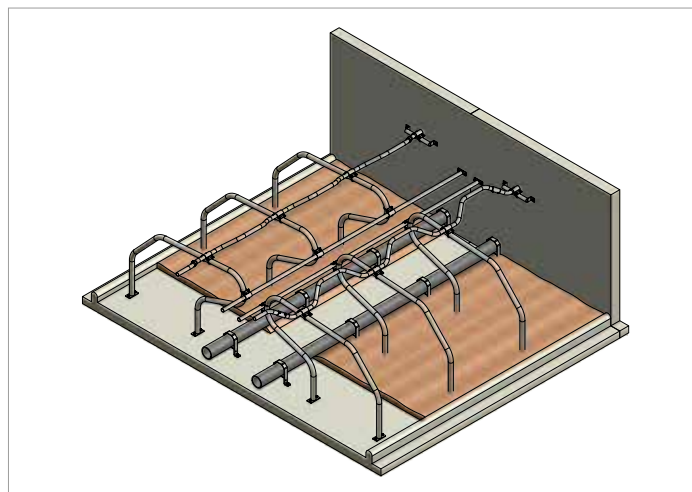

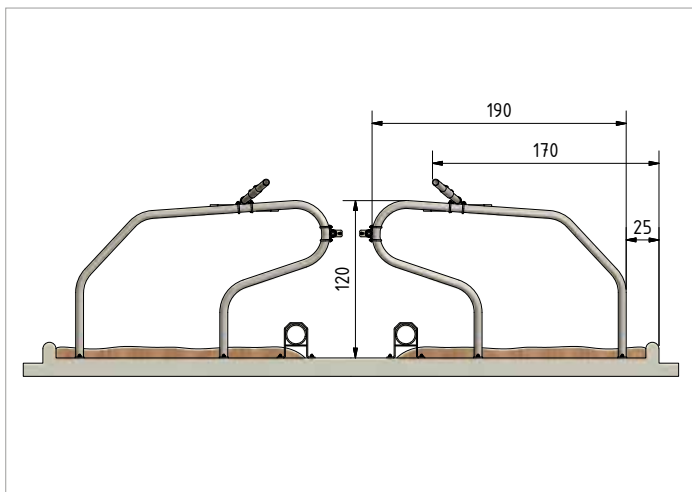

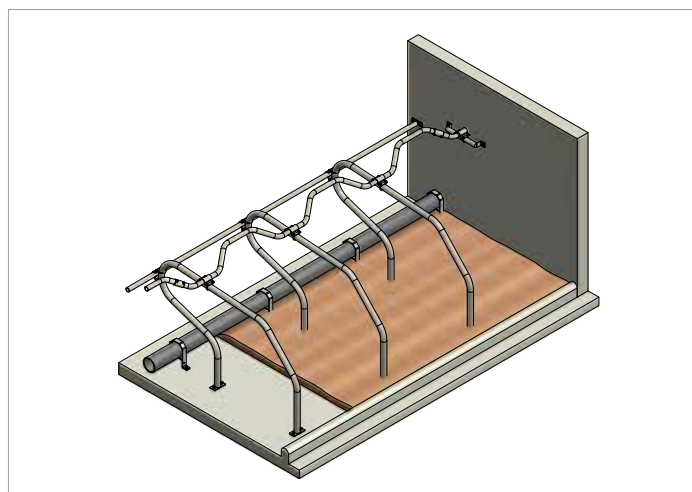

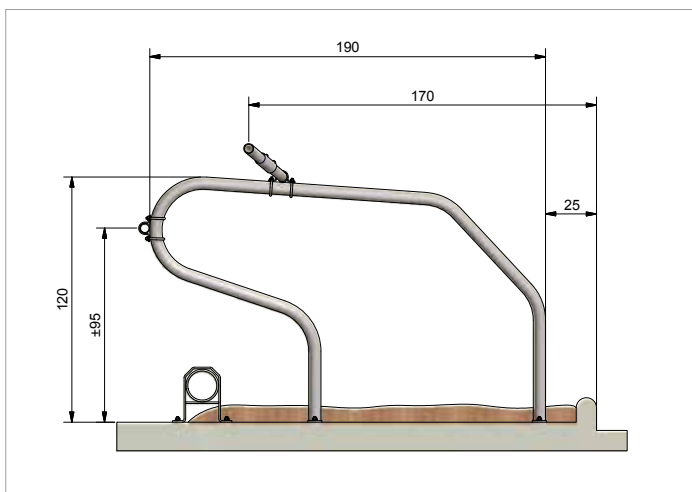

- Specifically for deep litter bedding
- Manufactured from sturdy thick-walled steel tube 60.3 × 3.65 mm
- Solid three-point construction
- Floor mounted through front and rear mounting foot

DS is available in 2 versions:

- Model DS 120 with standard construction height of 120cm and nose bar height of 95cm
- Model DS 130 with standard construction height of 120cm and nose bar height of 105cm

Optional:

- Wave-shaped shoulder bar
- Round-shaped synthetic knee bar

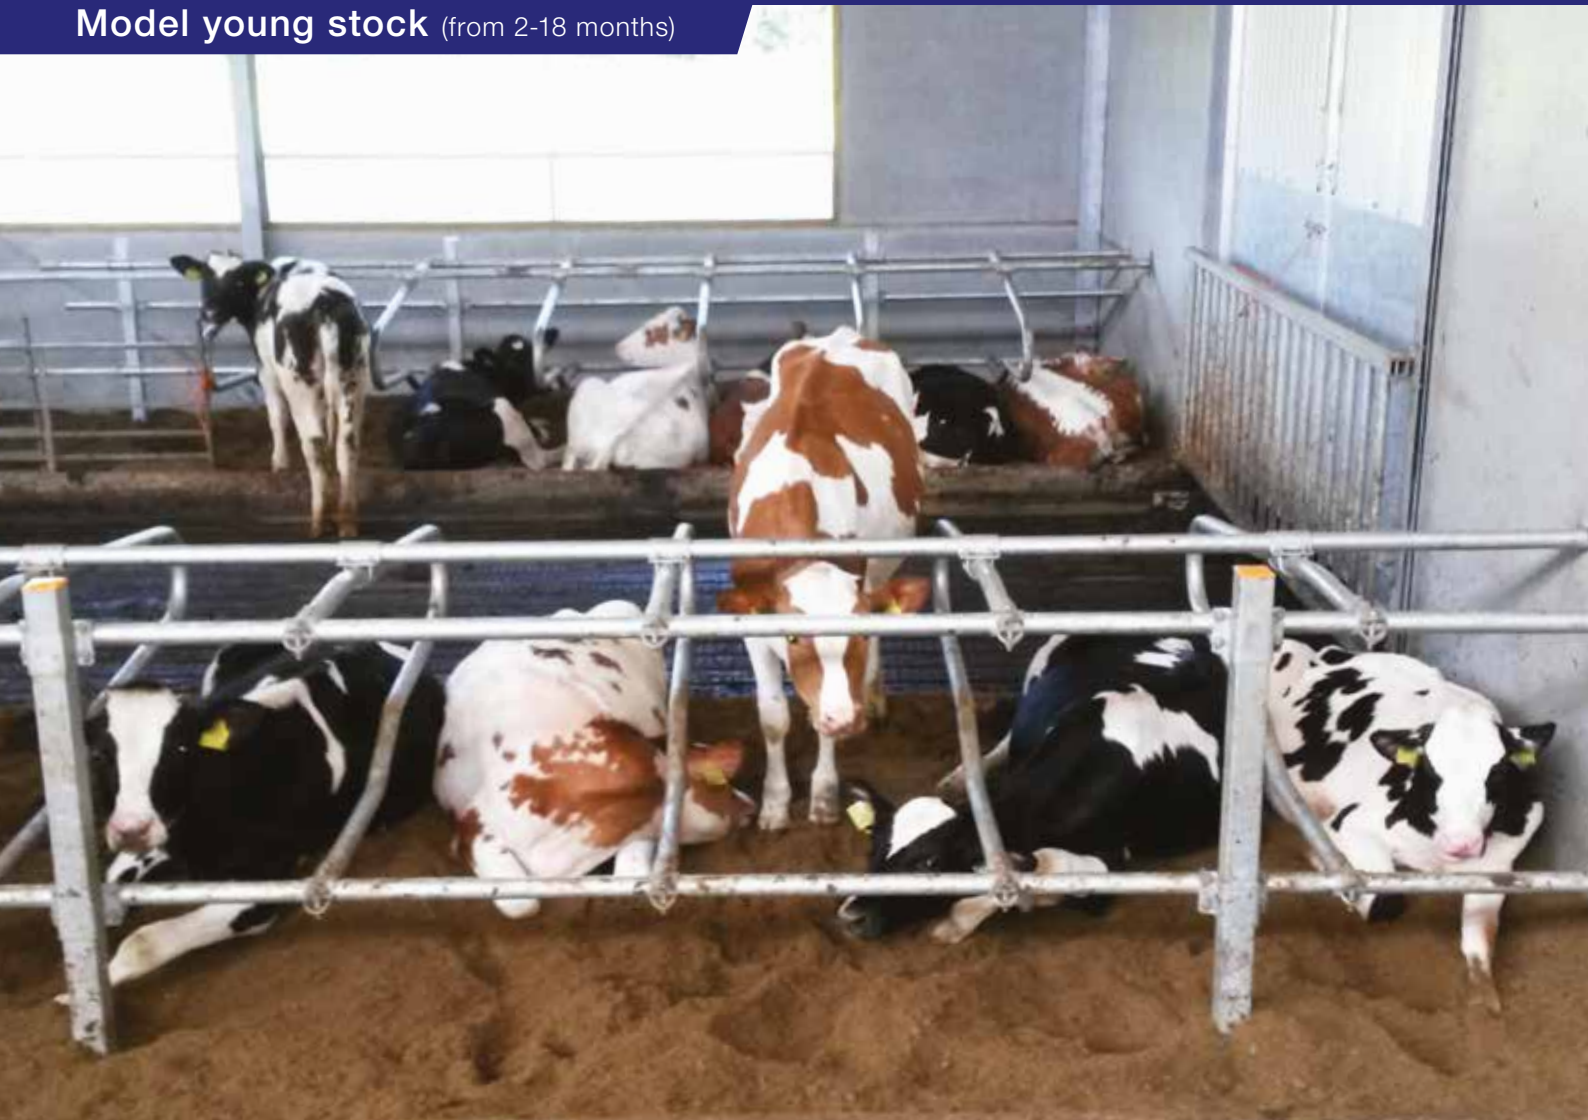

Article No.	Description

Polylatex mattress with rubber top layer

Wave profile (alternative fabric profile)

Top layer 8mm, hammer stroke profile

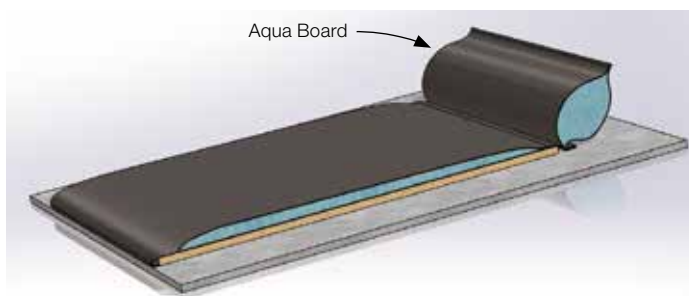

- Rubber mat with fabric profile 3.2mm thick (200mm wide)
- Available in two versions: fabric profile 3.2mm and wave profile 3.2mm
- Or 8mm rubber top layer with heavy tissue reinforcement and provided with hammer stock profile on top for proper grip
- Polylatex soft mattress, 30 or 40mm thick, from ideal combination of PU and latex foam
- Stable and elastic (pressing 240kg/m³)
- No dent formation
- Top layer tested by DLG
- Easy to clean

Article No.	Description

Alley floors

Alley floors on roll

Rubber mats in the alley

Alley floors allow the dairy cow to walk and stand softly and comfortably. On rubber floors cows show their natural behavior more than on concrete. Rubber is easy to clean and the surface provides good grip and high slip resistance. Rubber reduces injuries and leads to a better claw health.

Requirements for optimal use:

- A manure handling system which leads to clean and dry alleys
- Claw abrasion must be possible

Article No.	Description
41-55077-000	Alley rubber on roll 18mm, per m ²

Alley floor as single rubber mats

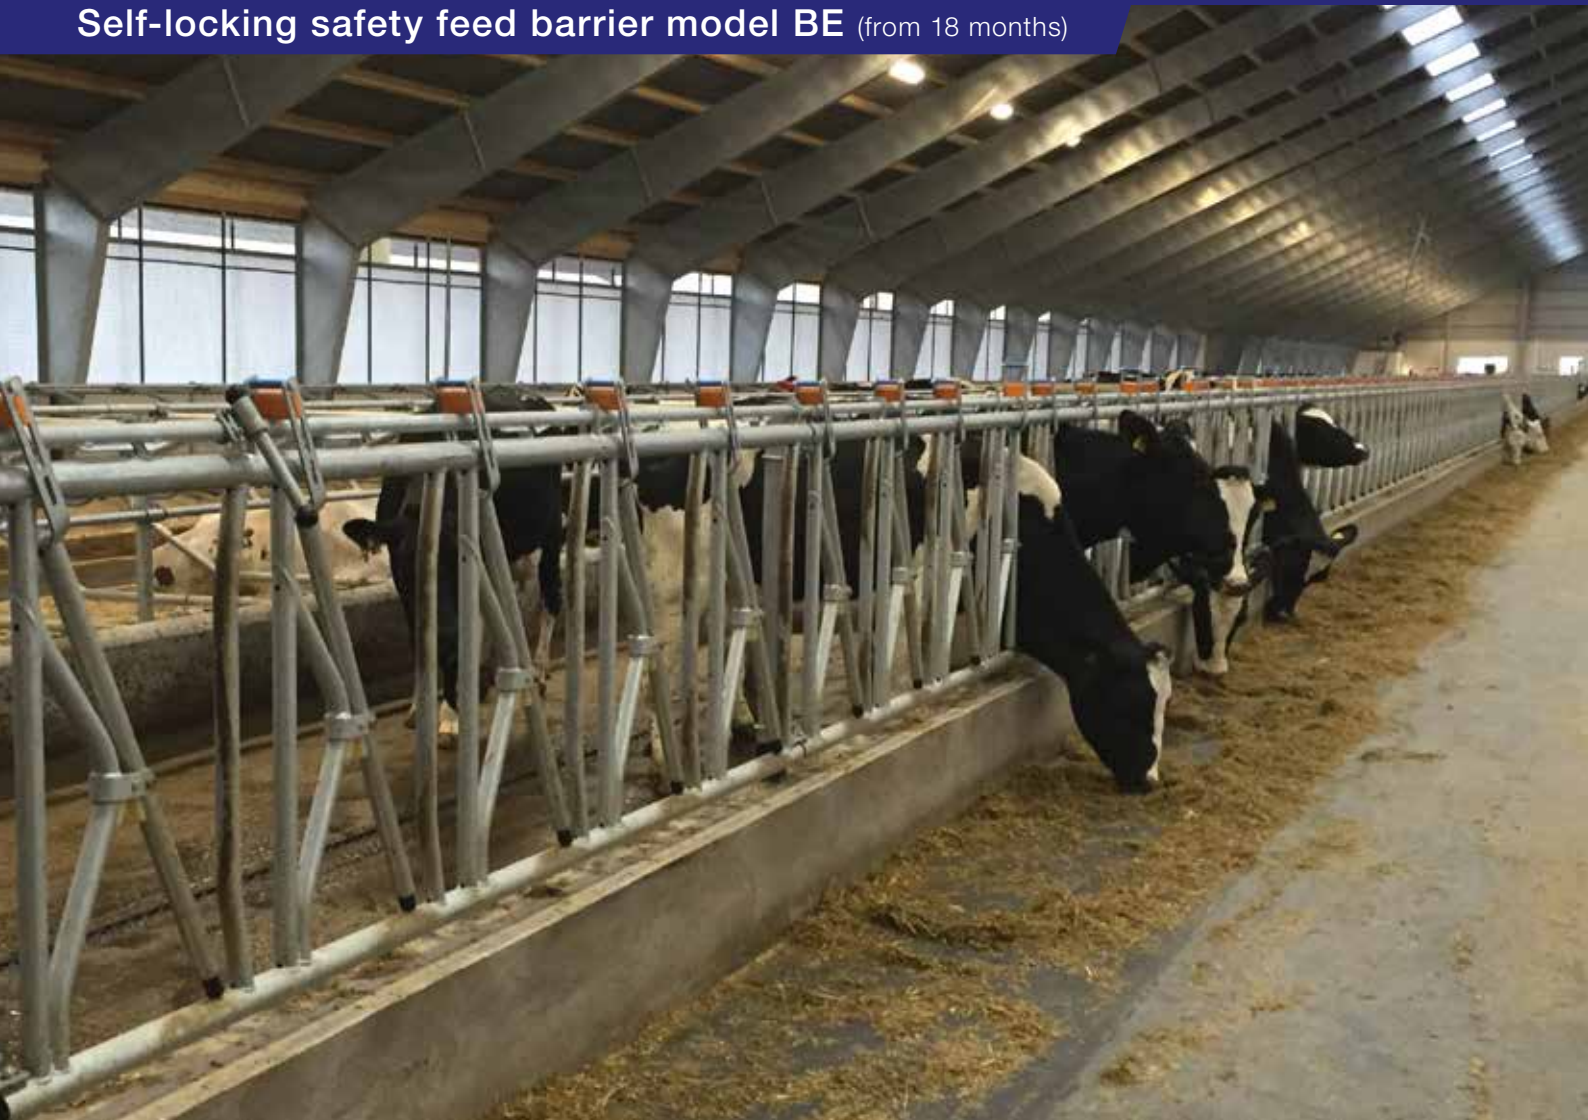

Single rubber mat KRAIBURG-KURA-S

- Slatted floor cover for dairy and young cattle
- Tailor-made for every slatted floor geometry
- Thickness: 24mm
- High slip resistance
- Improved walking comfort
- Supports claw health
- Dimensional stability and long durability through large-scale mats extending over several slatted floor elements
- Easy mounting
- Compatible with use of manure scraper or robot scraper
- Tested by DLG

Feed barriers

Tubular barrier fence

Distance support feed tube (15 or 20 cm)

Tubular feed barriers consist of one or two horizontal placed tubes mounted to support posts or rafters. This system is perfect for farmers who do not want or need to lock their cows and provide them free access. The upper tube preferably is mounted with a distance support (15-20cm) helping to prevent pressure spots in neck.

Article No.	Description

Water supplies

Inox drinking trough with 160mm outflow opening

- Trough and valve-cover made from thick INOX plates
- Easy to clean due to the large outflow opening of Ø 160 mm
- Side connection for the circulation system
- Standard provided with Suevia Masterflow-valve (connection 26.9 mm)
- Available for floor and wall mounting, with legs or wall supports
- Measurements excluding valve-cover: 46 x 100 / 200 / 300 / 400 cm

Article No.	Description
50-23001-100	Drinking trough Inox 100cm compl., wall mounting
50-23001-200	Drinking trough Inox 200cm compl., wall mounting
50-23001-300	Drinking trough Inox 300cm compl., wall mounting
50-23001-400	Drinking trough Inox 400cm compl., wall mounting
Optionally available with protection bracket:	
50-22034-100	Protection bracket for drinking trough 100cm
50-22034-200	Protection bracket for drinking trough 200cm
50-22034-300	Protection bracket for drinking trough 300cm
50-22034-400	Protection bracket for drinking trough 400cm
All drinking troughs are also available for floor installation.	

FROST-RESISTANT DRINKING TROUGHS, MODEL SPRING

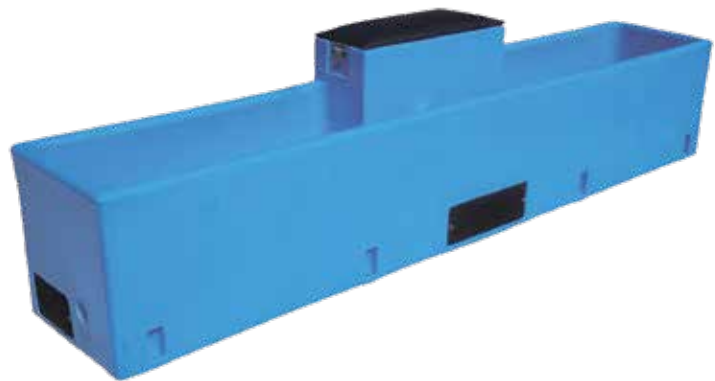

54-00223-200

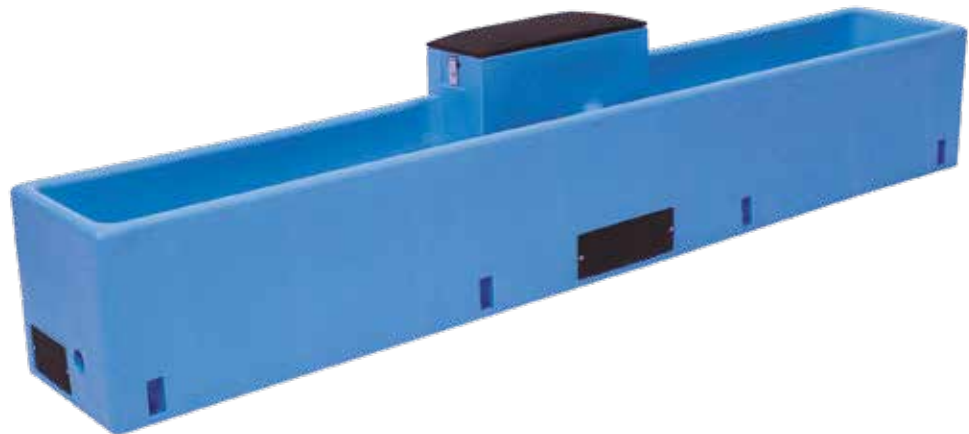

- One-piece body Rockite-polyethylene construction, high-impact resistance
- Smoothly finishing, no obstructions
- Extraordinary durable material
- Resistant to corrosion and dent
- 5-8cm urethane insulation
- Rubber gasket valve-cover
- Round bottom for easy cleaning

Partition barriers

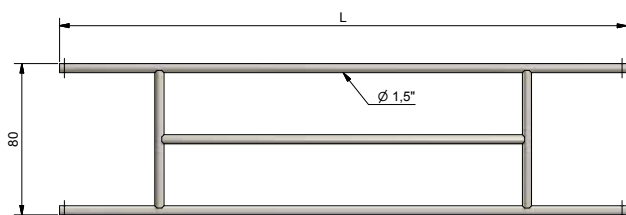

We provide a wide range of partition barriers for the purposes of cow traffic and group partitioning in modern barns. The barriers, hinges and locks are produced in high quality in our own factory.

Our range of partition fences consists of:

- Partition barriers with 80cm height
- Insert-extensions
- Draw gates up to 500cm wide
- Group barriers
- One-way gates
- Cow treatment road

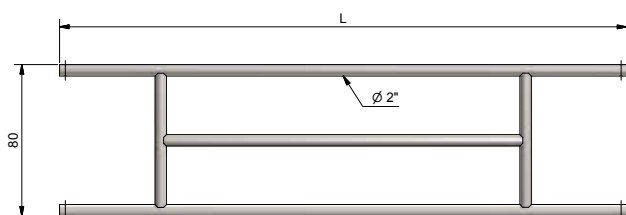

PARTITION BARRIERS 48.3mm x 80cm

COW TREATMENT ROAD

Article No.	Description
98-22195-080	Support post 70 mm sq. x 80cm screw on
90-22513-095	Anchor bolt hot galv. M12x95
35-21245-070	Meter square tube 70 x 70 x 4 mm galv.
35-21243-070	Tube coupling 70 mm sq. inner
35-21242-000	Fixing plate 70 mm sq. to 70 mm sq.
35-22084-000	End bow 60.3mm
96-21220-200	Meter tube galv. 60.3mm
35-21241-000	Partition rod

DRAW GATES

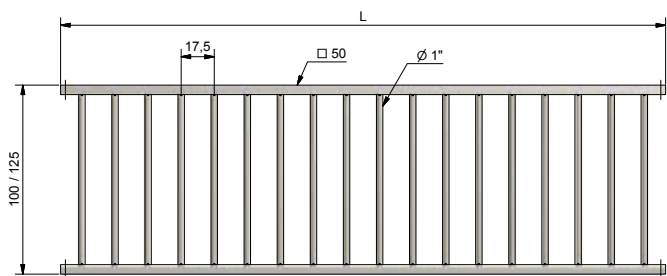

- Draw gate widths up to 500 cm
- Light operation due to the weights which are adjusted to the different widths and large pull blocks
- The weights are integrated in the support posts
- Easy to move because of the practical locking mechanism
- Installation height: 320 cm
- Clearance height: 220 cm

Article No.	Description
95-29920-300	Support post 76.1 mm x 300 cm heavy duty base
30-29920-000	Set accessories draw gates, 3-bar end section for 48.3mm tube
96-21220-150	Meter tube 48.3mm galv.
90-22513-095	Anchor bolt hot galv. M12x95
90-29172-300	Slat anchor INOX M12x300

GROUP BARRIERS LARGE STOCK

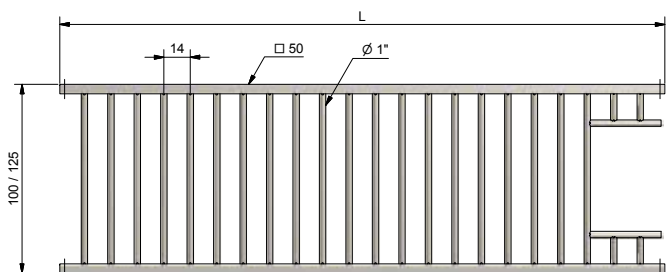

Article No.

Description

31-22420-320	Group barrier 320 x 100 - 17.5cm
31-22420-600	Group barrier 600 x 100 - 17.5cm
31-22420-100	Group barrier 100 - 17.5cm made to measure, per meter
31-22425-320	Group barrier 320 x 125 - 17.5cm
31-22425-600	Group barrier 600 x 125 - 17.5cm
31-22425-100	Group barrier 125 - 17.5cm made to measure, per meter

	90-22222-000	Cross-over clamp	42.4 mm x 33.7 mm
	90-22223-000	Cross-over clamp	42.4 mm x 42.4 mm
	90-22225-000	Cross-over clamp	48.3 mm x 33.7 mm
	90-22224-000	Cross-over clamp	48.3 mm x 42.4 mm
	90-22226-000	Cross-over clamp	48.3 mm x 48.3 mm
	90-22227-000	Cross-over clamp	60.3 x 48.3 mm
	90-22228-000	Cross-over clamp	60.3 x 60.3 mm
	90-22229-000	Cross-over clamp	76.1 x 60.3 mm

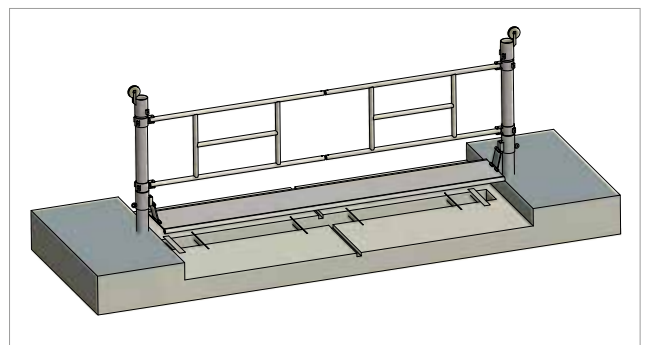

Over-path bridge for discharge shaft

On long alleys the discharge channel can be placed in the middle or at the end.

Synchronized with the scraper lifts the platform for manure removal up and sets after cleaning back in position. A clean solution.

- For alley widths from 200 up to 500cm
- Best walkability of the floor and safe operations are taken into account
- Also usable with hinged partition barriers or draw gates
- Safe and robust technique

Manure handling systems

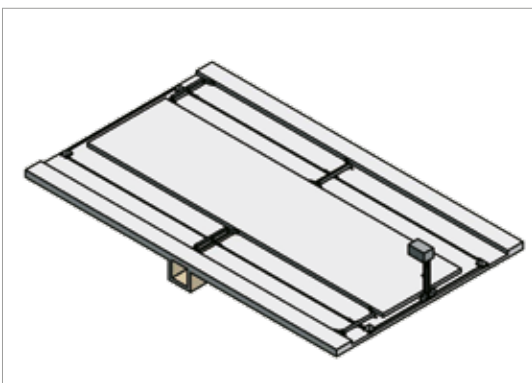

Scraper systems

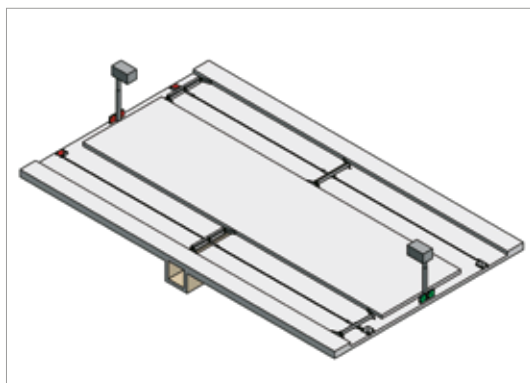

Beerepoot supplies a wide range of labour saving and low maintenance scraper systems for cow barns e.g. combi scrapers, folding scrapers and slatted floor scrapers. All scrapers are custom manufactured. This means that they are made to measure for every different application.

Our different kinds of scrapers are driven by our high-quality and reliable chain drive units with a drive power of 0.75kW (Manganese steel chain 13mm x 36mm).

- One drive unit for alley lengths up to 100 meter (1x 0.75kW)
- Two drive units for alley lengths from 100 meter (2x 0.75kW, auxiliary drive)
- Low-emission
- Low-wear and robust technique
- Clean and dry alleys and therefore better barn hygiene and animal welfare
- Low construction costs

One drive unit for alley lengths up to 100 meter

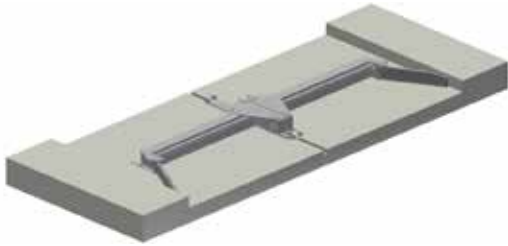

Two drive units for alley lengths from 100 meter

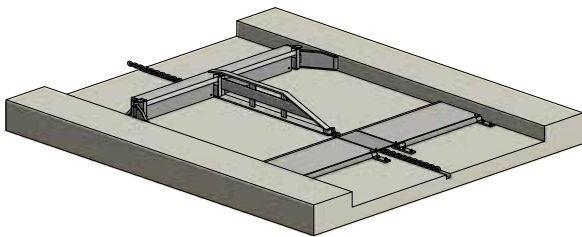

Automatic chain tightener

Manure handling systems

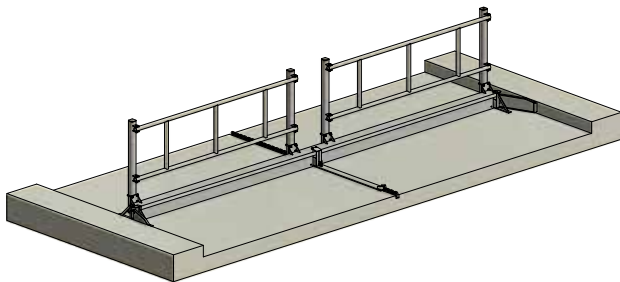

MANURE SCRAPERS

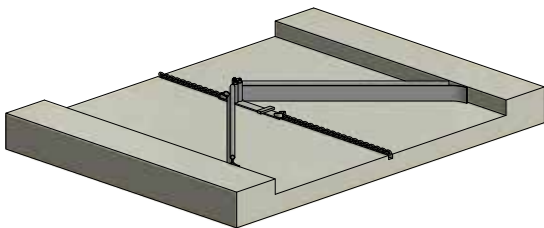

Combi scraper in U-profile (also for alleys with rubber flooring)

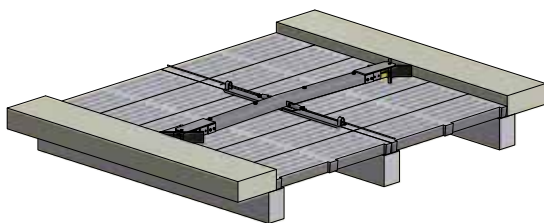

Combi scraper in U-profile with discharge flap

Combi scraper in U-profile with crowd gate

Folding scraper

Slatted floor scrapers (up to 8m width)

Description

Combi scraper in U-profile with 500mm endblades (Drive: chain and rope/steel wire)

60-84120-249	Combi scraper U-Profile 200-249 cm
60-84120-299	Combi scraper U-Profile 250-299 cm
60-84120-349	Combi scraper U-Profile 300-349 cm
60-84120-399	Combi scraper U-Profile 350-399 cm
60-84120-449	Combi scraper U-Profile 400-449 cm
60-84120-499	Combi scraper U-Profile 450-499 cm
	up to 800cm, on request

Options:

65-84131-000	Surcharge PU cleaning rubber 0-299 cm
65-84132-000	Surcharge PU cleaning rubber 300-349 cm
65-84133-000	Surcharge PU cleaning rubber 350-399 cm
65-84134-000	Surcharge PU cleaning rubber 400-449 cm
60-84129-000	Surcharge unequal alley lengths
65-84138-000	Surcharge retractable
65-84136-000	Surcharge scraper-device for discharge flap
60-84305-000	Surcharge crowd gate, push-button control
65-84130-000	Surcharge sled on combi scraper

Also available:

- Combi scraper for flat alley with longer endblades 750mm, on request
- Combi scraper for alleys with rubber flooring, on request

Folding scrapers (drive: chain)

64-84250-279	Folding scraper 251-279cm with U-profile
64-84250-319	Folding scraper 280-319 cm with U-profile
64-84250-359	Folding scraper 320-359 cm with U-profile
64-84250-399	Folding scraper 360-399 cm with U-profile
64-84250-439	Folding scraper 400-439cm with U-profile
64-84250-480	Folding scraper 440-480 cm with U-profile

Slatted floor scrapers (Drive: chain and rope/steel wire)

60-84240-249	Slatted floor scraper 200-249 cm
60-84240-299	Slatted floor scraper 250-299 cm
60-84240-349	Slatted floor scraper 300-349 cm
60-84240-399	Slatted floor scraper 350-399 cm
60-84240-499	Slatted floor scraper 400-499 cm

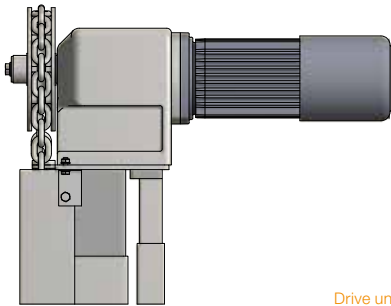

Options:

66-84229-000	Surcharge unequal alley lengths

CHAIN DRIVE UNIT

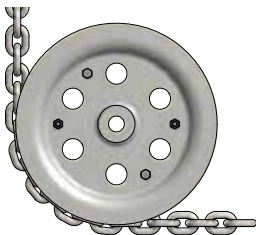

Drive unit on console for chain

Drive unit 0,75kW

SPS control system

Corner wheel 380mm

Corner wheel 290mm

Article No.

Description

Drive unit on console for chain, 0.75kW/400V

60-84165-200	Drive unit 0.75kW on 2m console incl. screw jack for corner wheel 290/380mm
60-84166-200	Drive unit 0.75kW on 2m console with auxiliary engine for 290/380mm corner wheel

Vertical wheel set

60-84155-290	Vertical wheel set for corner wheel 290mm
60-84155-380	Vertical wheel set for corner wheel 380mm

Electronic switchbox

60-84177-000	Electronic switchbox with time switch
60-84303-000	Temperature sensor compl.

Corner wheels, diameter 290 / 380mm

60-84150-290	Corner wheel 290mm compl.
60-84150-380	Corner wheel 380mm compl.

Steel chain

61-84222-013	Steel chain 13mm, specially hardened, per meter
68-73552-013	Chain link connector 13mm

Discharge flaps

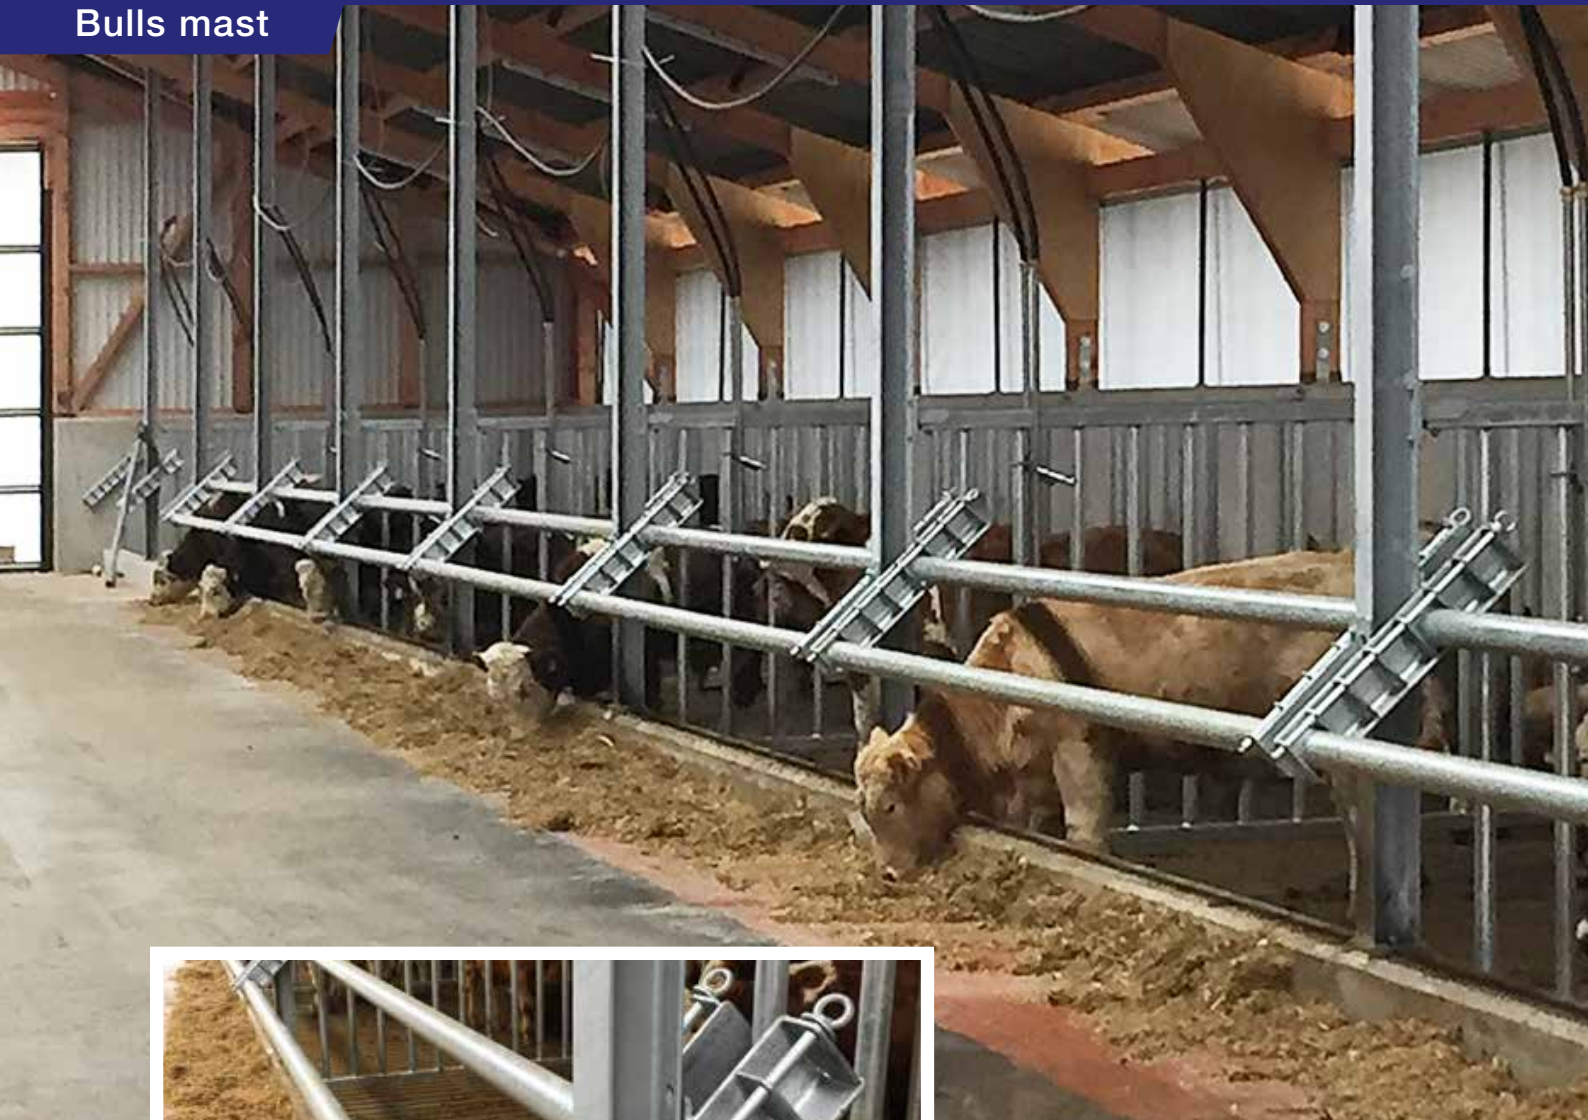

68-84200-299	Discharge flaps compl. 250-299 cm
68-84200-349	Discharge flaps compl. 300-349 cm
68-84200-399	Discharge flaps compl. 350-399 cm
68-84200-449	Discharge flaps compl. 400-449 cm

Diverse

68-73564-001	Meter UNP 65 profile with connector, galvanized
68-73527-050	Automatic chain tightener
68-73565-001	Meter round steel bar with chain connector

Bull barns

Bulls mast

For the husbandry of bulls, open barns with fully slotted floors and straw barns are widespread. On slotted floors the bulls are placed in big partitions. The manure handling takes place with a underfloor slurry system. In straw barns the animals transport the manure on the alley - therefore is a light slope of the lying area needed. The manure handling takes place with a folding scraper or a mobile system.

- For high performance in bull fattening
- Feeding table barriers out of diagonal feed barriers or adjustable shoulder bars
- Heavy duty material
- Manure handling with folding scraper or underfloor slurry system
- Promotes animal health (especially joints) and high lying comfort

Versions and prices on request | Feed barrier model diagonal: page 37 | Tubular barrier fence: page 38

Separators

Sedimax® Separators

Separate solids from liquids

Exemplary applications:

- Green bedding
- Biogas plants
- Agriculture; for waste water treatment and to solve the nitrogen problem
- Execution according to individual requirements

Sedimax® SP 50

Performance:	Max. 50 m ³ /h
Sieve drum:	600/300/250
Joint widths:	0.25 - 0.90 mm
Inlet / Overflow:	NW 75 / NW 100
Connections:	400V, 50 Hz, 5.5 kW
Housing:	stainless steel
Screen basket:	stainless steel
Screw:	stainless steel / stainless steel / PU
Measurements:	L 1950 mm, B 800 mm, H 1500 mm
Weight:	560 kg

Sedimax® SP 10

Performance:	Max. 10 m ³ /h
Sieve drum:	290/150
Joint widths:	0.25 - 0.90 mm
Inlet / Overflow:	NW 50 / NW 75
Connections:	400V, 50 Hz, 2.2 kW
Housing:	stainless steel
Screen basket:	stainless steel
Screw:	stainless steel / stainless steel / PU
Measurements:	L 1200 mm, B 680 mm, H 1100 mm
Weight:	170 kg

SIEVE DRUM AND MEMBRANE

In different variations and for individual requirements

Technical versions and prices on request

Separate fine particles from liquids

The micro filter is used in combination with a press-screw separator and enables the subsequent microfiltration of the liquid phase from the preceding separation stage.

The filter is mainly used for manure, fermentation residues in biogas plants or industrial waste water – thus in almost all wastewater treatment processes.

- After treatment of the liquid phase from the first separation stage
- For very pure applications
- High filtration efficiency
- Self-cleaning operation
- Fast installation
- Simple maintenance
- Low operating costs
- Stainless steel sieve in 50µm, 25µm or 15µm (0.05 mm, 0.025 mm or 0.015 mm)
- Drive power: 7.5kW
- Compact dimensions

Versions and prices on request

Pumps and mixers

EISELE Vertical pumps

EISELE – Vertical pumps – Type VM:

- VM with electrical motor (heavy duty) from 11.0 – 22.0 kW and a capacity up to 6000 l/min

Standard equipped with highly wear resistant mechanical seal and a shaft running in an oil bath. The screw wings with 12-times counter blade are covered with Widia steel.

V-Pumps are reliable, robust and safe dry running. Hereby and because of the ease of use, a long life is achieved at high power.

Optional extras:

- Nozzles
- Various switches and control systems
- Oil reservoir
- Gearbox with through shaft
- Various drainage elbows

Article No.	Description
Vertical-slurry-pumps	
71-70793-154	Vertical pump VM 1541, 11.0 kW / 15 PS / 400 V
71-71131-204	Vertical pump VM 2041, 15.0 kW / 20 PS / 400 V
71-71149-254	Vertical pump VM 2541, 18.5 kW / 25 PS / 400 V

EISELE Submersible mixer type GTWS-U

EISELE – Submersible mixer – Typ GTWS-U

in sizes 7.5kW / 11.0 kW / 15.0 kW
available in

- Heavy duty agricultural execution (GTWS/GTWSU).

Standard equipped with installed thermal contacts, control electrode and double wear resistant mechanical seal. The submersible mixers, with their robust and reliable construction, enable a high stirring performance and long running times.

Optional extras:

- Guide rail made of stainless steel
- Agitator blade out of stainless steel
- Various switches and control systems

EISELE – Submersible pump – Typ AT-R

available in the sizes 7.5kW / 11.0 kW / 15.0 kW / 18.5 kW / 22.0 kW and depending on the power equipped with

- Open impeller
- Screw impeller with Widia steel

Standard equipped with installed thermal contacts, control electrode, double wear resistant mechanical seal and large catch. AT-R submersible pumps have proven themselves a thousand fold in agriculture. They are characterized by high reliability, longevity, simple installation and easy handling.

Optional extras:

- Affixing covering
- Flange bows and flange nozzles
- Various switches and control systems

Pumps and mixers

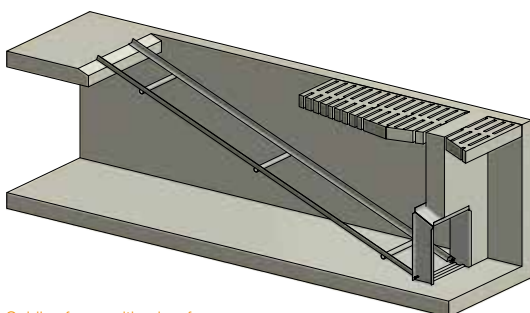

Super-Gigant and Mammut mixers

PTO

Mammut electric mixer

Guiding frame with mixer frame

All types of mixers are equipped with the special liquid manure-proof mud bearings, which gives the mixers a long service life. The special mixing cylinder round the wing ensures highly effective intake of the manure. All mixers are hot-dipped galvanized.

The mixers can be equipped with a reversing unit, so that they are suitable for 2 directions, suction and pressure.

PTO MIXER TYPE SUPER-GIGANT AND MAMMUT

Article No.	Description
74-80800-400	Slurry mixer Super-Gigant 400 tube length = 400cm (total 431cm), with 3-bladed wing, D=50cm, mixer frame 54 x 54cm, including mixer support excluding power take off Shaft; Capacity: 2130m³/h
74-80800-500	Slurry mixer Super-Gigant 500 tube length = 500cm (total 531cm) Further provided as Super Gigant 400
74-80800-600	Slurry mixer Super-Gigant 600 tube length = 600cm (total 631cm) Further provided as Super Gigant 400
74-80900-400	Slurry mixer Mammut 400 tube length = 400cm, with 3-bladed wing, D=60cm, mixer frame 70 x 70cm, including mixer support excluding power take off Shaft; Capacity: 3350m³/h
74-80900-500	Slurry mixer Mammut 500 tube length = 500cm, further provided as Mammut 400
74-80900-600	Slurry mixer Mammut 600 tube length = 600cm, further provided as Mammut 400

MAMMUT ELECTRIC MIXER

Article No.	Description
73-80900-400	tube length = 400cm, with 3 bladed wing d=60cm, mixer frame 70 x 70cm with 25PS electric motor and gear box, incl. star-delta turning switch for two directions, excl. cable; Capacity: 3350m³/h Other sizes on request

- Maximum dimensions: 6.00 m width, 6.00 m height
- High wind protection
- For daily opening and closing
- Drive unit with 400V electrical motor or 230V tube motor with or without radio remote control or hand winch
- Roll up opening system
- Stabilized by horizontal tubes and guide rails with lip seals
- Incl. bale coverage

LUBRATEC® Roll-up systems

- Pulleys or a central drive tube are used for suspension
- Opens from the top downwards and winds onto a bottom roller
- Opening heights up to 3.10m
- System height (fabric width) up to 3.20m
- Maximum system length: 80m
- Drive optionally manual or electrical, with or without control system

LUBRATEC® Roller blind door

- Maximum dimensions: 5.50m width, 5.00m height
- For daily opening and closing
- High wind protection
- Optional storm safety
- Driven by tube motors with or without remote control or hand winch
- The tubes run in aluminium guide rails with lip seals
- The hanging winds upwards onto a central roller

LUBRATEC® Roller blind front with tube motor for in closure use

- Maximum opening height up to 5.00m
- Maximum system length up to 15.00m
- Curtain wraps in the middle of a 78mm steel slot tube
- Electronical drive unit 230V with minimum space requirement
- Guided with lateral guide rails and sealing lips
- Without ratchet tension
